CORE COMPETENCIES

Java | Spring Framework | REST APIs | SQL | AWS | Microservices | Distributed Systems | CI/CD | High Availability | Troubleshooting | Software Architecture

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience in backend development within the banking industry, working on mission-critical systems with high availability and large-scale transactional environments.

Experienced in **Java, Spring Framework (Spring MVC), SQL, REST APIs, JSP, Maven, and Apache Tomcat**, contributing to the development, maintenance, and evolution of enterprise applications focused on reliability, performance, and maintainability.

Hands-on experience with **production incident resolution, troubleshooting, log analysis, legacy system modernization, and integration of critical business systems** in enterprise environments.

Experience with **microservices architecture, distributed systems, Clean Architecture, AWS, CI/CD, and software engineering best practices**.

PROFESSIONAL EXPERIENCE

Software Engineer | Bradesco

Jun 2021 – Sep 2024

- Developed and maintained enterprise applications using **Java, Spring Framework (Spring MVC), JSP, Maven, and Apache Tomcat** in high-availability banking environments.
- Developed and maintained **REST APIs**, integrations between critical systems, and **SQL** queries for enterprise applications, including legacy **COBOL** systems.
- Contributed to legacy system modernization initiatives, improving application stability, performance, and maintainability.
- Implemented an internal system enhancement that reduced customer data lookup time by approximately **30%** through the development of a search optimization mechanism.
- Resolved **production incidents**, performing troubleshooting, debugging, log analysis, monitoring, and root cause analysis for critical systems.
- Worked within engineering practices involving **Git, Gitflow, CI/CD**, and Agile methodologies using **Scrum**.

RELEVANT PROJECTS

Bank Simulator | Full-Stack Banking Platform

2025 – Present

- Developed a banking platform using **Java, Spring Boot, and PostgreSQL**, focusing on security, scalability, and transactional consistency.
- Implemented **JWT-based authentication and authorization**, as well as **RSA encryption** for transaction signing.
- Developed **REST APIs**, webhooks, and service integrations using **AWS Secrets Manager**.
- Applied automated testing practices using **JUnit, Mockito, H2, and TDD**.
- Built the frontend using **React and TypeScript**, applying concepts of **distributed systems and transactional consistency**.

TECHNICAL SKILLS

Languages: Java, Python, SQL, COBOL, JavaScript, TypeScript
Backend: Spring Framework (Spring MVC), Spring Boot, REST APIs, Microservices, JDBC, JSP
Servers & Build Tools: Apache Tomcat, Maven, Ant
Cloud: AWS (S3, Lambda, SES, Aurora, Secrets Manager, API Gateway)
Databases: PostgreSQL, MySQL, SQL Server, H2
Architecture: MVC, Microservices, Distributed Systems, Clean Architecture
Security: JWT, RSA, Authentication, Authorization
Testing: JUnit, Mockito, Integration Testing, TDD
Frontend: React, TypeScript, HTML, CSS
Tools: Eclipse, IBM Rational Application Developer (RAD)
DevOps: Git, Gitflow, CI/CD
Methodologies: Agile, Scrum, Kanban

EDUCATION

Mackenzie Presbyterian University	2019 – 2023
Bachelor's Degree in Computer Science	

LANGUAGES

English: Advanced (C1 - Professional Working Proficiency)

CERTIFICATIONS

CS50: Introduction to Computer Science — Harvard University (edX)
Microsoft Certified: Azure Fundamentals (AZ-900) — Microsoft
Google Cloud Skills Boost — Google Cloud Platform
CCNA: Cisco Certified Network Associate — Cisco
Introduction to Cybersecurity — Cisco
